

Cellular and Molecular Core

Directors:

Robert Meller D.Phil.
An Zhou Ph.D.

Overview:

The cellular and molecular biology resource core provides researchers at the Morehouse School of Medicine Neuroscience Institute access to state of the art scientific resources that are cost prohibitive to a single laboratory.

Key Capabilities:

The molecular biology component offers support for the expression and measurement of genes in multiple cell systems. This includes an expression suite, multiple realtime PCR options, and access to the Keck-funded Affymetrix microarray 1.0 2.0 2.0k
